

Proposal for Constructing Medical and First Responding System in Event-site during the Tokyo Olympic and Paralympic Games in 2020. AC2020.

During the Tokyo 2020 Olympic and Paralympic Games, Tokyo 2020, live sites will be set up to watch competitions through live broadcasts outside the competition venue. At those live sites, various events such as not only watching the competition but also sports experience · dissemination of Japanese culture are planned, and many visitors are expected.

In similar live sites established at past large-scale events, occurrence examples of seriously injured patients and multiple victims have been reported.

Therefore, as the Academic Consortium on Emergency Medical Service and Disaster Medical Response Plan during the Tokyo Olympic and Paralympic Games in 2020, we propose the necessity of establishing the medical and first respond system at those live sites including response to accidents with a large number of injured people.
